

# Road, curb, and sidewalk work

## Perley Health

Please be advised that in the coming days there will be significant work on and around some of the roads, curbs and sidewalks on the Perley Health property that will have an impact on the movement of members of our community.

This work will begin July 17 and is expected to continue for seven weeks.

Please know that we prioritize safety and open communications in advance of this work and throughout this project.

We will make every effort to keep our community informed while ensuring a smooth and secure experience for all members of our community during this period.

There are several stages to this project as work begins near Russell Road, in the parking lots and the parking gates and sidewalks, and includes the installation of new light posts. At times, the vehicle lanes may be reduced.

Here's an overview of the work ahead along with details and tips to keep our community safe:

### Installation of temporary sidewalk ramp adjacent to the sidewalk from Russell Road.

- This temporary ramp for pedestrian and wheelchair access will be constructed adjacent to the 1780 apartments and link to the sidewalk near the bus stop on Russell Road.
- For safety and privacy, a fence will be erected on both sides of this temporary walkway. (See image)
- Please be advised that on the Perley Health property, there are four other available walkways for pedestrian and wheelchair access including Botsford Street, Botsford Street South, Pullen Avenue and Saunderson Drive (See map on page 2).

Map of area.

### Resurfacing of parking lot entrance area

- This work will include resurfacing, in stages, from Russell Road through to the cenotaph in front of the Rideau Veterans Residence.

### Reinstating pedestrian sidewalk along entrance area

- This sidewalk was closed to accommodate installation of the parking gates in 2023.
- A new sidewalk will be installed along with landscaping.

### Installation of light posts

- Light posts will be installed along both sides of the road entering Perley Health.
